SHRINKING.**
*Peak Fast Losing
Its Reputation.*

**Big Lump Falls Out of Side,
Airman Flies Up; Now Its
Size is Doubtful.**

**Scientists Declare Measure-
ments Show Material
Falling Off.**

[BY CABLE-RECEIVED DISPATCH.]
PARIS, Sept. 4.—(Mont Blanc is steadily losing prestige as a mountain resort. Last year a big landslide out of the south face of the peak, near the top, and crashed in an avalanche down into Italy. Last month a Swiss alpinist fell up from Chamouix and landed within a comparatively short distance.

One of their number, M. Heusierrand, in a learned paper declared that from observations and measurements recently made with the most modern instruments by lui Helbronner and others, it appears that Mount Blanc is nine feet nine inches smaller than it was formerly believed to be.

Now the question arises, are the measurements more accurate or has the mountain shrunk? The latter theory is the one which is gaining credence.

At least, it is not the mountain at its ice cap which may, it is agreed, have crunk before the constant and fierce rays of the sun dur-

On this exceptional summer, many strange phenomena have been observed among the Alps that in theory is not considered in the most unlikely.

For instance, there was a time when up in Alsace the river Rhine went so dry that fairs were held in the river bed, but suddenly one evening without any rain having fallen the river began to rise again and soon reached almost its normal height at which it stayed throughout the summer.

Season, which is the subject of the book, is a very interesting and

That is what has probably happened to Mont Blanc, it is believed, on the ice cap, which is at least 90 feet thick, nine feet may have melted away.

None of the scientists, however, who made the calculations, asserted it is to the accuracy of their instruments that Mont Blanc owes more than three times, more than

**"OLIVER OSBORNE"
SOUGHT BY POLICE.**

**DOUBLE OF NOTED CRIMINAL
LAWYER BEING SOUGHT ON
LARCENY CHARGE.**

[BY A. P. NIGHT WIRE]

NEW YORK, Sept. 4.—Charles H. Wax, the "Oliver Osbornes" who figured as the double of James W. Osborne, well known criminal lawyer, a breach-of-promise suit brought against him by Rae Tanner several years ago, has disappeared while under \$1000 bail on a grand larceny charge. He was arrested recently under the name of Charles Canby, complaint of a young woman. Wax is also sought by the Federal authorities and the officials of the Lem. Or., penitentiary. He was released by the Parole Board, which

ing a sentence there, to visit his mother in the East. He escaped recognition by detectives here. He is known to have passed along roadway as a Far Western man temporarily out of funds.

This Week's Vote Offers in \$12,000 Prize Campaign

Another great week in the National Producers Company's big 14-day Price Contest came to a close Saturday, and this morning begins a real busy history-making week for the company. The contest is now in its final stages and the prize is being determined for the prizes. Vast quantities of votes (and votes will) can easily be piled up through the special ad offered this week. Read the specials closely.

COMMEMORATE "BE"

- 4—Veto Washing Powder (big tin)
- 5—Diamond Shoe Polish (cans)
- 6—Giant Macaroni (large crates)
- 7—Giant Macaroni (large crates)
- 8—Karna Cleaner (cans)
- 9—Braden Preserving Co. labels
- 10—Crown Oil (cans)
- 11—Gum or United or Oseigan soap.
- 12—Worth any Colonial Coupon Book.

Have Money, Put It in the Commonwealth National Bank. The Commonwealth National Bank has opened its doors and has summed them and voted this week. (Statements of it or checking accounts of this or over it are as follows.)

For one account, one million votes.
For two accounts, three million votes.
For three accounts, five million votes.
For six accounts, twenty million votes.
For ten accounts, fifty million votes.
For twenty accounts, one hundred million votes.
Vote duplicates deposit slips of the initial

Note—All Coupon Books for Combination Notes may be bought at cost.

GRACEY CARDS

We have a very handsome card to be hung in the grocery stores outside the door. This card, which is made of cardboard, will give organizations 100,000 votes for each card they get grocers to put in their windows or in the store.

Work this week. Also the million-acre
cotton acreage is being planted and ac-
counts this week. It is least fifteen.

COTTON BOOK SPECIAL
5 Million Vests Worth \$10 Worth
(Five Regular Vests)

There are different kinds of cotton books
in the world, as listed below. It is desired
to get these books well distributed this
week. The following are the books:

in suppressing such fires as may occur within a radius of five miles from the point where you are hunting.' The permit was issued and

huckleberry, the dewberry, the raspberry and the blackberry, are the "meat" of all frugal souls who are fond of Old-time cooking. The fruit crop for this year. "Recently," says the Forest Service of the United States Department of Agriculture, "one of these souls who has respect for the service came in-

"He rather surprised us," the reporter stated, "after some fishing it was decided to give him a 'hunting and fishing permit' with 'gather berries' inserted. This hunting and fishing permit carries a clause that states: 'You are privileged to hunt and fish in the area located within the Natural Bridge National Monument before he takes it away' and his big improvement is that he also takes care of the game there must be on the mountain." This is not the midst of a fire season, but it can safely be said that the idea of protecting the forests from fire was never so generally understood and scattered among the people in and around the Natural Bridge.—(D)

Make Reservations for Mountain, Seaside and Other Resorts

Times Free Information Resort Bureau

Corner First and Broadway

The bureau is for the accommodation and benefit of persons seeking interesting routes of travel, desirable hotels and resorts, recreation and amusements at the seashore or in the mountains. Particulars are furnished by competent attendants and by correspondence to the general public regarding rates and attractions of resorts and amusements. The bureau is located at the corner of First and Broadway streets, in the Times Building. It is open from 10 a. m. to 6 p. m. and is free of charge. Information may also be obtained at the Times Branch Office, 615 South Spring Street, Phone 100; Automatic 1521.

SPEED OFFICER CRASH VICTIM.

Lynwood Garwood is Fatally Hurt While on Duty.

Succumbs in Hospital After Culver City Crash.

Laughed at Warning, Then Drove to Death.

Lynwood Garwood, one of the best-known motorcycle officers in the state, was fatally hurt early yesterday morning when he was thrown from his machine at Culver City, where he was patrolling the highway. His neck was broken and he died a few hours later at the Receiving Hospital in Los Angeles, where he had been rushed by Norman Manning of the Los Angeles Athletic Club, a friend of the officer.

Saturday night Officer Garwood, with his partner, James Kane, was patrolling the Ventura road near the intersection of the Ventura and Garwood roads. Kane was driving the motorcycle and Garwood was riding on the back. They were passing the officers at the same time and Kane went over one and a half miles. Each caught his man. Both officers were drunk and Mr. Garwood started for the officer's accustomed place on Washington street.

According to Officer Kane, Mr. Garwood turned out to pass a truck driven by A. J. Kling and a motorcycle. Mr. Garwood turned his machine quickly to avoid a collision and was thrown violently to the road, his head striking the pavement and the machine piling on top of him.

Shortly after the accident Mr. Manning arrived and placed the officer in his car and rushed him to the home of Dr. Foster M. Hull of Culver City. It was found that his injury was of such a nature as to warrant more than first-aid treatment and Mr. Manning brought the man to the hospital.

Mr. Garwood was known to thousands of motorists who frequent the beach roads as one of the best officers in the service. He enjoyed the reputation of being of the family type and was a very popular officer. He was a member of the Culver City Police Department.

Mr. Garwood, who was known better as "Lennie," leaves a widow and a 3-year-old daughter. He was a member of the Culver City Police Department.

Dr. G. W. TAPE, Manager

WOMAN HURT BY AUTO. Struck by Machine While Alighting from Street Car.

After alighting from a street car on First street near Evergreen avenue yesterday, Mrs. Laura F. Palmer, 55 years of age, of 2119 E. Main street, was struck by a machine and injured.

She was rushed to the Receiving Hospital, where she was found to have a number of fractured bones.

BOOSTER AD RESPONSES COMING IN.

St. Louis Leads in Replies in All-Year Club's Summer Lure Campaign.

Though all the returns from the summer advertising campaign of the All-Year Club of Southern California have not yet been tabulated, an analysis made yesterday shows that nearly one-tenth of the people who announced their intention of coming here for the summer in response to the advertising reads in St. Louis.

This estimate is based on tabulation of 1145 letters, of which 195 came from St. Louis. In the opinion of the All-Year executives, this is very strong evidence of the appeal made merely by letting the world know of the comparative coolness of our summers.

It has been found that 1145 replies which thus far have been analyzed show that 1145 people in St. Louis have announced their intention of coming here for the summer in response to the advertising reads in St. Louis.

Such a ready discrimination against our climate is a trustworthy safety factor, and the All-Year executives are confident that the summer will be a successful one.

What a scurry of letters! The All-Year executives are confident that the summer will be a successful one.

WHISKERETTES SEEN AS BOON.

Feminine Beards Expected to Outrival—er, Limbs.

Blame for Hirsute Epidemic Lifted from Cigarette.

Nature Giving Women New, Vampish Appeal.

BY ALMA WHITAKER.

Hair may be a woman's crowning glory, don't you know, as long as it is curly and wavy. But directly it blossoms out into whiskers, mustaches, billy goats and permanent cowboy curls, no really refined cut-of-the-beautiful-dams appreciates her hirsute possessions with any enthusiasm.

So when those mischievous Parisian physicians informed the world last week that hairy women were on an alarming increase and that the naughty cigarette and the still lurking cocktail were responsible, sophisticated femininity shuddered.

KING GOLD FAME MAY COME BACK.

Old-Time Bonanza Section of Arizona to be Operated With Modern Ore Plant.

By ALMA WHITAKER.

YUMA (Ariz.) Sept. 4.—Old-time miners will remember the activity in the region seventy-five miles northeast of Yuma, in what is known as the King of Arizona district, so named from the mine of that name which was formerly regarded as one of the richest producers of the state.

Under former ownership, the mine was operated continuously from 1897 to 1910, at which time operations were discontinued when the mine operators lost the vein of free gold which they were following.

Examinations with a view to the probable operation of the mine have been recently made by the Arizona Mining Company, which has been recently made by the Arizona Mining Company, which has been recently made by the Arizona Mining Company.

**CREATE NEW
POLICE JOBS.**

**Fresno Passes Ordinance to
Reorganize Department.**

**County Makes Big Saving in
Highway Costs.**

**Tommy Milton Enters Auto
Racing Classic**

FRESNO, Sept. 3.—Adopting the recommendation of Police Chief Frank F. Truax, the City Commissioners passed a reorganization ordinance for the police department in "the interests of efficiency." The plan will cost the city an additional \$185 a month, according to the letter of transmittal signed by Mayor Truman G. Hart.

Following the passage of the ordinance, Chief of Truax announced that he had appointed J. A. Wiestrom, formerly police sergeant, to the new position of captain of police. M. H.

Lincoln and Guy Shaden, former police officers, and a number of other police, and the following are to be sergeants, one in charge of traffic: E. A. Fornes, C. J. Wickstrom, J. H. Hargrave and J. E. Shaden. Sergeants will be J. F. Chapin and R. O. Davis, and detectives of police, J. L. Broad, A. D. Truesdell, J. Merritt, A. A. Nichols, T. O'Brien, A. Casselton and John Albion.

REDUCE ROAD COST.

Fresno county's good-roads system has been created for the smallest known governmental cost for overhead, resulting in a saving of \$1,341,544.40, according to a report for the purpose out of the \$4,500,000 bond issue, according to the report of Engineer Chris Jensen and Road

This sum is to be converted to the various supervisory districts and apportioned to the various construction contracts as provided for in the bond issue, but which could not be finished, owing to rising costs and consequent inability to create the mileage contemplated at the time of the bond issue.

According to the report, the cost of overhead has been less than 1 per cent, a figure which it is claimed is without parallel.

MILTON TO RACE

Tommy Milton, winner of the Indianapolis and Tacoma speedway races this year and leading contender for the national title for

District Fair automobile classic of 160 miles on October 1, according to an announcement at fair headquarters yesterday. A second one was reserved for the following day, when the Grand Prix, forwarded his blank to the local race management. Edward Meyer of Redlands has entered a Redlands special, naming himself driver, and has definitely signed the contract. They are Tommy Miller, Reese Searis, Jimmy Murphy, Tom Alley, Eddie Hearn, Alton Soules, Frank Elliott, Eddie J. Allen, Ira Van, Joe Bush and John E. Bennett. The race will be held on the Fresno one-mile board speedway.

KEEP WHAT THEY HAVE.

"Fresno needs nothing. It only needs to keep what it already has," declared Senator M. R. Harris of Fresno in speaking on "What Fresno Needs" to the members of the Kiwanis Club yesterday. The Senator pointed out the agricultural possibilities of the county and said the benefits heretofore have been scant thought for the future. He declared that the valley will need all the power which is available and decried the efforts of the municipal Los Angeles water works to take future and tie up available sites to the Sierras for future needs.

FINDS READY MARKET.

PROSPECTS OF OIL.
BRAWLEY, Sept. 4.—Samples of the balliages from the Brawley oil well brought in today give fair showing of oil under chloroform test. The oil is plainly apparent in the many bottles that are being returned in the show-up, and formation has been penetrated at a depth of 2550 feet which is said to be the best indication the well has yet

ASK OPINION OF MEMBERS.

Open Shop is Now a Big Question in Pasadena.

Crown City to Have Elaborate Holiday Program.

New Pastor Takes Pulpit of Crown City Church.

PASADENA, Sept. 4.—Shall the Pasadena Chamber of Commerce and Civic Association remain neutral on the subjects of religion, labor and politics or shall it concern itself with such matters in certain ways?

This is a matter the members of the organization, representing all elements of the city's population, will decide this week, by a referendum. Questionnaires on the subject have been mailed to all the members, by action of the board of directors.

It is said that mention of the subjects "religion" and "politics" is a bit of camouflage, or swank, and that the real issue is the question of whether the chamber will be at liberty to take sides on the labor-capital issue.

Up to the present time the organization has a rule providing for a non-committal policy, or strict neutrality, on the issues mentioned, but many members of the organization are urging that the chamber come out for the "American plan" or open-shop policy on the labor question.

LABOR DAY OBSERVANCE. Business generally will be suspended in Pasadena tomorrow in observance of Labor Day. The observance here will include a baseball game between the American Legion and Elks' team; an address by Dr. Frank G. Tyrrell and a picnic and sports in Brookside Park.

Miss Ruyra Virides, noted soprano of the concert and vaudeville stages, has been secured by the Labor Day Committee to sing the aria from "La Tosca" and other numbers at the outdoor celebration in Brookside Park.

It is believed this feature will rival the occasion upon which Mrs. Schumann-Heink sang in Busch gardens. The Pasadena Concert Band will be her accompanist.

Jack Regan, saxophonist, also is on the program. Athletics and games will follow the speaking and music program and in the evening there will be a dance at the L.O.O.F. Temple.

NEW PASTOR ARRIVES. Rev. Angus Hugh Cameron, new pastor of Westminster Presbyterian Church, has arrived from Coronado and began his pastorate by preaching the sermon at the morning services at the church today. Dr. Cameron comes to Westminster from the Presbyterian Church at Coronado. Prior to that time he was pastor of a large Presbyterian church in Detroit, Mich., for many years. Westminster is a growing church in the northeast section of the city. Three years ago the congregation erected a handsome new church edifice.

SCOUTS IN CAMP. Many of the Pasadena Boy Scouts are spending the Labor Day holiday at their new clubhouse at Camp Huntington, in Rubio Canyon. Assistant Scout Executive Vaughn is in charge. The clubhouse was built and presented to the scouts by the Pasadena Rotary Club last year. The land was given to the scouts by Henry S. Huntington.

Old plunkin and camphor chests and boxes, new lot reasonably priced at Grace Nicholson's Pasadena Shop.—(Advertisement.)

A Suggestion. Book Agent—Sir, I have a little work. Busy Merchant—Then suppose you go and do it. Have a care, that's a little.—(Boston Transcript.)

HUNTERS RETURN WITH TWO BEARS.

MOTION PICTURE DIRECTOR TELLS THRILLING TALE OF THE CHASE.

(LOCAL CORRESPONDENCE.)

REDLANDS, Sept. 4.—The days of '49, when "bar meat" was a common delicacy for the feast, have not entirely disappeared from California. Cecil B. De Mille, well-known motion picture magnate, and John H. Fisher, his business manager, have the proof. It is in the shape of two fine bear skins from animals they killed in the most remote and inaccessible part of the high Sierras on a hunting trip from their home in Hollywood this afternoon.

The two men went by automobile as far as possible, then took horses and three guides into the wilderness and most inaccessible country in California. They traveled a country through which few white men have gone, a country without trails, rocky, and heavy with underbrush.

The first kill came one morning as they were on the hunt. There was a crashing in the underbrush and a big black bear came into view. The horses stamped and the party was thrown into confusion. De Mille's horse slipped on a rock and was killed. Fisher's horse wheeled suddenly and he was thrown some distance, but fortunately he clung to his life. Badly shaken and bruised, he was able to get to his feet and with two well-directed shots killed the bear, which was much surprised at the meeting as the members of the hunting party.

The first kill came one morning as they were on the hunt. There was a crashing in the underbrush and a big black bear came into view. The horses stamped and the party was thrown into confusion. De Mille's horse slipped on a rock and was killed. Fisher's horse wheeled suddenly and he was thrown some distance, but fortunately he clung to his life. Badly shaken and bruised, he was able to get to his feet and with two well-directed shots killed the bear, which was much surprised at the meeting as the members of the hunting party.

De Mille was forced to kill his horse, but disaster was turned into victory. He decided to leave the dead horse as bait, and for four days he stayed at the place, hoping the meat would attract a bear. On the fourth day his vigilance was rewarded, for a big bear came to the spot and he was able to get a good shot and brought the animal down.

Having accomplished the purpose of the trip, a bear for each of the hunters, and with one horse dead and another gone, having run away when the first bear appeared, the party reached civilization after a trying journey. Fisher having been badly cut and bruised when he was thrown from the horse, and all members of the party having suffered from the American plan, the party decided to leave the mountain and return to the city.

ROMANCE ENDS. Banker Father Seeks to Have Marriage Annulled.

(LOCAL CORRESPONDENCE.)

VENTURA, Sept. 4.—The romance of Alice Chaffee, pretty 17-year-old daughter of J. H. Chaffee, a local banker, and Cecil Adams, an oil man, has ended. Mr. Chaffee filed suit to have his daughter's marriage annulled.

The girl and Adams eloped to Santa Barbara and were married ten days ago. The attorney handling the case for Mr. Chaffee asserts that the girl and Adams have never lived together as husband and wife; that the girl was residing with her parents and was under their control at the time of the elopement, and it is sought to have the girl resume her maiden name.

The elopement caused a great sensation here at the time it was discovered, from the prominence of the girl's father, Alice Chaffee was a high-school student at the time of the elopement.

VICTIM OF TURKS. Known in Ventura.

(LOCAL CORRESPONDENCE.)

VENTURA, Sept. 4.—Decapitated by Turkish bandits and his body buried, John Poules, who lived in Ventura for some years as a young boy, has met a frightful death near Smyrna.

He is the nephew of William Poules, proprietor of a fruit store here. Poules returned to Greece to enter the service of his country. He was

WOMAN INJURED IN AUTO SMASH.

Hotel del Coronado, Ideal Resort.

(LOCAL CORRESPONDENCE.)

ONTARIO, Sept. 4.—Mrs. Addie May of 4417 Toland Way, Los Angeles, was at the San Antonio hospital tonight suffering from a badly lacerated back and severe shock as the result of a motor car crash on the Pothill Boulevard near San Antonio avenue this afternoon.

The car in which Mrs. May was riding with a party of friends is reported to have come to a stop when it was bumped from the rear by another machine, the name of whose driver was not learned. In the impact Mrs. May was thrown violently forward and badly shaken. Other occupants of both cars escaped with minor injuries. Mrs. May's condition was not considered serious. Both cars were damaged.

GUARD RESCUES WOMAN BATHER.

(LOCAL CORRESPONDENCE.)

LONG BEACH, Sept. 4.—Mrs. B. J. May of 535 West Third street, was rescued from a perilous situation this afternoon by Edward Hudson, a life guard, who was on duty at the beach at the time, but who rode to the beach in a police car, stripped to his underwear, and swam out to her.

Mrs. J. May was caught in the rip, but had the presence of mind to float and save her strength. Several other life guards hurried to the scene from various stations and assisted Hudson in the rescue.

AWAIT DEPORTATION. Twelve Chinamen are being held in the County Jail awaiting deportation, and Charles W. Mission Valley, charged with smuggling the Chinamen from Mexico into this country.

The thirteen were taken into custody at Del Mar at 9 o'clock this morning, as they were making their way up the coast in a motor truck with the side curtains up. They had left Calexico, last evening and were going to San Francisco.

The arrests were made by Immigration Inspector F. M. McManis and Special Customs Agent O. C. MacCumber.

TO REME WORK. LONG BEACH, Sept. 4.—Construction of a pier is being rushed by the Shell Oil Company to replace one destroyed by fire when it was struck by a ship in a gale Thursday midnight.

Predictions that the well can be brought in as a heavy oil producer in about a month were made at the site today by employees of the company. It was asserted that the gusher did not damage the hole.

DELAID MESSAGE. (LOCAL CORRESPONDENCE.)

VENTURA, Sept. 4.—Several years ago an official in the Standard Oil Company's offices at San Francisco sent a message to the office in Los Angeles. It was never received. Yesterday Frank Brigham picked it up in a field at Salicy. It was inside a small tube wired securely to a bit of bone, all that remained of the carrier pigeon that had fallen before a bullet or some other disaster as it winged its way south.

WILLS PROBATED. (LOCAL CORRESPONDENCE.)

REDLANDS, Sept. 4.—Wills of two pioneer and wealthy residents of Redlands have been filed for probate, those of Mary M. Farwell and Willard A. Nichols.

Mrs. Farwell left an estate valued at more than \$10,000. She gave \$50 to each of her grandchildren, to Eva S. Allen, \$500 to Flora Howes and the remainder of the estate to be divided, one-half to her son, Lyman, and the other to Virginia, Ruth, Clara and Ray Farwell, grandchildren.

Mr. Nichols left a large estate. To his nephews, Henry A. Nichols and John Nichols of Cambridge, Mass., he left \$150 each. To Frances Nichols, a niece, he left the remainder of his estate to go to his sister, Elizabeth Keith Mills, of Marblehead, Mass.

IS SURF VICTIM. Los Angeles Man Dies of Heart Failure Battling Waves.

(LOCAL CORRESPONDENCE.)

LONG BEACH, Sept. 4.—George A. Blue, 51 years of age, Los Angeles realty dealer, who lived at 336 South Figueroa street and had an office in the Linsner Building, succumbed to heart failure while battling against a strong tide in the surf off the foot of Parker avenue, Seaside Park, this afternoon.

Life guards, police, firemen and others worked half an hour in an effort to resuscitate him. The body was taken to Bryum A. Peck's morgue.

Blue was living temporarily at Tent No. 4, Mohegan Camp. Mrs. J. E. Hunter, both of Los Angeles, occupied the same tent.

Hunter was in the surf when Blue's death occurred. Blue had been warned by physicians that his heart was weak. His wife, Mrs. Irene Blue, lives in Garbana with a daughter, Mrs. Henry Downey, and a sister, Mrs. George Turnham, live in Lankershim.

RARE RUG IS STOLEN. Thief Also Takes Silk Pajamas, Shirt and Collar from Residence.

(LOCAL CORRESPONDENCE.)

LONG BEACH, Sept. 4.—If you see a man clad in a Chinese rug, silk pajamas, a shirt and collar, but no tie, notify the police at once, for those things were stolen from the home of H. H. Nelson, 568 South St. Andrews Place, during the absence of the family Saturday and Sunday. The rug is valued at several hundred dollars.

Father Loses Boys Because of Inhuman Treatment.

(LOCAL CORRESPONDENCE.)

INDIO, Sept. 4.—A number of date fanciers have been during the week just past, for the purpose of looking over the big shipment of off-shoots of African plants received and to be grown here under the supervision of the United States government.

All of the dates came from North Africa and were shipped by Prof. Mason, expert of the government and who is still there endeavoring to get additional shipments, which should arrive in Indio in another six weeks.

The present shipment consisted of 1412 Deglet Noor, perhaps the best known of all the African varieties in the United States; thirty-four Theories, thirty Deglet Belds, seven Hailones Louche.

The most desired variety was the Theories for which an order was placed for 1920 but, as stated above, only 34 of the variety were received. Prior to the receipt of this shipment, there were but eleven such plants in the United States, so far as is known.

The Deglet Belds is a variety that thrives in dry climates better than where moisture prevails and the Africans are said to prefer it to the Theories.

The Hailones Louche is an unknown variety here and much interest is attached to the outcome of the planting. These arrived in better condition than any of the others and indications are that they will prove harder.

Prof. Mason expects to ship several thousand Deglet off-shoots from the Upper Nile in Africa during the coming week. He has been assembling them for some time.

BURBANK BANK. New Institution Open for Business November 1.

(LOCAL CORRESPONDENCE.)

BURBANK, Sept. 4.—Jonathan S. Dodge, Superintendent of Banks, has authorized the organization of a new bank, to be located at Burbank, and called "State Bank of Burbank," with a capital stock of \$50,000, and surplus of \$10,000. The new institution will be ready for business November 1.

A building is now under construction for the new institution and the stockholders have organized by electing the following officers: F. A. Goodrich, president; W. J. Riley, vice-president and cashier; O. F. Goodrich, E. W. Morgan and E. J. Jackson, directors.

Mr. Goodrich, a wealthy investor, formerly of New York, who resides at Hollywood, but is one of the largest real estate owners in the city of Burbank, and has demonstrated his faith in the growth of the city by heavy investments in business frontage, and in the construction of new buildings.

Mr. Riley, vice-president, is an experienced and successful banker, who has recently moved to Burbank from Clifton, Ariz. where he was engaged for many years in the banking business.

LAST DAYS

Today and Tomorrow

Capit. Thos. A. Davis, President of the San Diego Army and Navy Academy, will be at the

Alexandria Hotel

(Continued from First Page.)

taken the duplicate key to the car from the chauffeur.

"Jimmie" jumped up from the table and raced for the front door. It was about 8 o'clock in the evening. He had been in the car for some time and had been looking out the window at the city lights.

Under the back seat he found a bundle and another bag. He had changed his clothes and then dashed across-country to the Coast route highway, where he flagged an automobile which took him into Palo Alto.

HUNT FRUITLESS. "Jimmie" has stolen the Pierce-Arrow and is on his way to Los Angeles, was the message received by Mr. Talbot here. Mr. Talbot got busy and in a remarkably short time every road leading into the city was guarded. All trains were watched, the stage lines were checked up and even the steamship companies added to the net that was thrown out to capture the ardent runaway bridegroom. The ditched automobile was not discovered for three days.

Down through the night came the Lark of the Southern Pacific. "Jimmie" boarded it at Palo Alto. He had forgotten his name or did not want to give it. So he sat up through the long night. As the train slowed down entering Santa Barbara, six feet of young manhood dropped off the rear platform, three blocks from the depot. "Jimmie" had himself where he could flag a stage to Los Angeles. Near the center of Hollywood he got out, and a few moments later had the best friend of his bride on the telephone.

A big horn "honked" in front of the Kingsland residence.

"I can't get out, for I am in a awful hurry," called the young lady to Katherine and her mother as they stood in the doorway. Katherine dashed for the auto, hatless and with a ringing peal of laughter and a wave of her hand at the astonished mother the machine sped around the corner.

Two days later "Jimmie" was told that if he called at the Pacific Coast Circuit Company at 2:30 p.m. the following day he might get a job morning at 7 o'clock and that night he began pulling game from hot ovens. Today he will be graduated to a truck, which he thinks will be much better, as it will keep him outside all day and allow him to get home in time for dinner at 8 o'clock.

"There is just one question I would like to ask you," said Mr. Talbot to his son at the Circuit company last week. "Where did you get the money to come to Los Angeles?"

"Why," said "Jimmie," "all the merchants in Redwood city are my friends and I shook hands with all of them when I went shopping with mother."

BASEBALL and LATE SPORTING NEWS

ANGELS PLUCK DUCKS TWICE.

McCredie's Teethers Absorb Brutal Treatment.

Crandall, Home-Run Author, Has a Warm-up.

Ten Thousand Nongamblers Watch the Sessions.

BY HARRY A. WILLIAMS.
Los Angeles continued to take Portland's measure and, starting from the hip, twice ascertained the shortest distance to the point of the chin.

Our athletes clinched the series by taking the frontispiece, 7 to 2, and added insult to manslaughter by winning the chaser bill, 11 to 0.

McCredie's teething ball team can take a lot of punishment without flinching. That's because it has been reared on pain and brutal treatment.

This team is like the cuffed lady making her first trip on the railroad. Following a severe head-on collision, she was found in her seat in the badly demolished car placidly watching of a basket lunch. Every one else had jumped through the window.

"What you still here?" shouted the conductor breathlessly. "We have just had an awful wreck. Is that so?" replied the brunette man with mild interest. "I thought that was the way a train always stopped."

NOT A WITNESS.
Portland takes two awful beatings in one afternoon, and there is no complaint from the players. They think that is the way the game is always played.

The two contests were witnessed by 16,000 nongamblers, with seven gamblers of gaming instincts on the outside looking in.

George Lyons and Doc Crandall were solitary too stout for the game and in only one of the eighteen innings did Portland cross the plate. Meanwhile, the Angels were lavishly scattering footprints on the sands of time.

McCredie sent a Coleman and a Pomeroy into the double header, made Portland sound like a "million-dollar" ball team on paper, and Coleman and Pomeroy wrecked the necessary steam in the Portland basement, and Pomeroy could stop the second to the Seals, 2 to 5.

Two more games this afternoon. McCredie is a guy who can try anything twice.

STARTS COUNTING.
Los Angeles started accumulating in the second frame, counting two. Coleman and his support cracked with beautiful co-ordination in the fourth. Crawford again started the damage, this time with a safety. Nine again downed the Portland team, and the second was a throw into left field, followed by a general movement on the bases. Crawford and McCredie landed as second. Lyons drove McCabe and Baldwin across, and went on when Glavin hit a wild one past Great Guy, the Leonaides of our home plate. Great Guy and Lyons did the rest. McCredie never let anything get past him.

In the fifth, Ruben Ellis batted for Crawford and drove in a run. These days Ruben appears in the spotlight just long enough to keep his complexion tanned up. Now a coacher's second was a throw into the eighth, when the Braves indicated two consolation falls.

The second game was heated from a warm-up for Doc Crandall, an author of half-baked home runs, and in the eighth, he sent a home run to drive in a run. McCredie started the second with a home run, and the Seals, 2 to 5.

George Lyons and Doc Crandall were solitary too stout for the game and in only one of the eighteen innings did Portland cross the plate. Meanwhile, the Angels were lavishly scattering footprints on the sands of time.

McCredie sent a Coleman and a Pomeroy into the double header, made Portland sound like a "million-dollar" ball team on paper, and Coleman and Pomeroy wrecked the necessary steam in the Portland basement, and Pomeroy could stop the second to the Seals, 2 to 5.

Two more games this afternoon. McCredie is a guy who can try anything twice.

STARTS COUNTING.

Los Angeles started accumulating in the second frame, counting two. Coleman and his support cracked with beautiful co-ordination in the fourth. Crawford again started the damage, this time with a safety. Nine again downed the Portland team, and the second was a throw into left field, followed by a general movement on the bases. Crawford and McCredie landed as second. Lyons drove McCabe and Baldwin across, and went on when Glavin hit a wild one past Great Guy, the Leonaides of our home plate. Great Guy and Lyons did the rest. McCredie never let anything get past him.

In the fifth, Ruben Ellis batted for Crawford and drove in a run. These days Ruben appears in the spotlight just long enough to keep his complexion tanned up. Now a coacher's second was a throw into the eighth, when the Braves indicated two consolation falls.

The second game was heated from a warm-up for Doc Crandall, an author of half-baked home runs, and in the eighth, he sent a home run to drive in a run. McCredie started the second with a home run, and the Seals, 2 to 5.

McCredie is a guy who can try anything twice.

Actors in Skit, "Who's the Champ?"

Principals in Today's Middleweight Title Bout.

At the left is Johnny Wilson, who in forty-seven States is middleweight champion of the United States. At the right is Bryan Downey, who comes from Ohio and is in that State acknowledged officially as the victor over Wilson in their last bout and the consequent middleweight champ. The photo of Wilson was taken at Manhasset, L.I., where the Boston boy has been using Carpenter's old training quarters.

AMERICAN LEAGUE. CLEVELAND WINS. DETROIT, Sept. 4.—Cleveland evened up the series with Detroit today by winning, 9 to 5. The visitors, on the short end of a 5-to-9 score when rain halted the game nearly an hour in the fifth inning, returned to the field and hit Daus and Parks hard. Smith hit a homer with two men on in the eighth. The score:

HUGHES PITCHES WONDERFUL BALL.

The superb hurling of Pitcher Hughes of the Anaheim Elks nine was largely responsible for the defeat of the Pasadena lodgemen, 3 to 1, at Brookside Park yesterday.

Crandall, Home-Run Author, Has a Warm-up.

Ten Thousand Nongamblers Watch the Sessions.

BY HARRY A. WILLIAMS.
Los Angeles continued to take Portland's measure and, starting from the hip, twice ascertained the shortest distance to the point of the chin.

Our athletes clinched the series by taking the frontispiece, 7 to 2, and added insult to manslaughter by winning the chaser bill, 11 to 0.

McCredie's teething ball team can take a lot of punishment without flinching. That's because it has been reared on pain and brutal treatment.

This team is like the cuffed lady making her first trip on the railroad. Following a severe head-on collision, she was found in her seat in the badly demolished car placidly watching of a basket lunch. Every one else had jumped through the window.

"What you still here?" shouted the conductor breathlessly. "We have just had an awful wreck. Is that so?" replied the brunette man with mild interest. "I thought that was the way a train always stopped."

NOT A WITNESS.
Portland takes two awful beatings in one afternoon, and there is no complaint from the players. They think that is the way the game is always played.

The two contests were witnessed by 16,000 nongamblers, with seven gamblers of gaming instincts on the outside looking in.

George Lyons and Doc Crandall were solitary too stout for the game and in only one of the eighteen innings did Portland cross the plate. Meanwhile, the Angels were lavishly scattering footprints on the sands of time.

McCredie sent a Coleman and a Pomeroy into the double header, made Portland sound like a "million-dollar" ball team on paper, and Coleman and Pomeroy wrecked the necessary steam in the Portland basement, and Pomeroy could stop the second to the Seals, 2 to 5.

Two more games this afternoon. McCredie is a guy who can try anything twice.

Oil, Mining Development in Many Fields.

RARE MINERALS,
METALLURGY,
CHEMISTRY.

low percentage, with some amphibole (hornblende) and a bluish green magnesian silicate mixed with talcose schist. This description covers the greater bulk of the rock.

The sample contains spots of white lime and magnesian carbonate, somewhat on the order of go-brown differentiating calcic glauconite (pseudomorph) and amygdaloid matter (almond, shaped ed.). All of the specimens react slightly for boron (borax).

Wollastinite.

PRESCOTT, Ariz. Aug. 21.—Q: Will you do me the kindness to classify the enclosed silicates?

Answer: The silicates are wollastinite, pyroxene, and quartz.

Not Radioactive.

HOLLYWOOD, Aug. 17.—Q: Question: Will you do me the kindness to classify the enclosed silicates?

Answer: Your card on which you put the above query, in writing, is accompanied with an attached newspaper item sent from Tuma, Ariz. by A. P. Night.

The telegram was sent broadcast to many newspapers and was published in the Times. The telegram stated that there was a discovery of a new radioactive ore by prospectors near Tuma, Ariz.

The substance "is said to have many of the properties of radium, is inert in form and a dull gray color."

We have no other knowledge that that received from you as to the origin of the sample you sent to this department of The Times.

As you are the general manager of a mining company in Arizona, you could not well afford to send a sample of any other ore than the one referred to.

The matrix of the referred to specimen is crystallized, white, and glistening. It carries some grayish and blackish blende (known as sphalerite, or sulphide of zinc).

With traces of pyrite and chalcopryite (copper and copper sulphide respectively), and some manganese.

We tested part of the rock and contents for radioactivity by the photographic-plate method, in the dark for seventy-two hours. When developed the plate was a blank instead of showing the usual iron-key, etc.

Carefully testing further, we find that there is not a trace of uranium in the sample submitted by you for analysis.

Probably a Patent.

CLAREMONT, Aug. 18.—Q: Enclosed is a mixture used as a cement to repair punctures in tubes. Could I get this analyzed?

A: As a rule, manufactured mixtures do not come within the purview of the department of The Times. The sample carried by you, however, and therefore, is qualitatively reported on as follows:

Muscovite (potash mica) is in the mixture with asbestos (various chrysotile) and traces of aluminous oxide, probably, from the white of eggs. There is also a trace of matter present, not fully determined, which appears to be gum arabic.

Impure Dolomite.

LOS ANGELES, Aug. 18.—Q: What does this sample contain? M: Silica, hornblende, lime and magnesian carbonate.

Free Gold Abundant.

LOS ANGELES, Aug. 18.—Q: I am sending you a specimen of rock I found in a vein of which I am anxious to know if it is gold bearing and if it might contain silver in the black constituents. It looks like a conglomerate of water formation and felsite. The veins are stained with gold, and I think it was told it was a cyanide rock. Could you tell me if heavy lime and porphyry are good formations? The sample is from a ledge about forty miles from Mecca.

A: A good deal depends on the formations referred to as to whether relating to fissures or contacts. Gold, silver, lead and copper could occur with porphyry rock and limestone at many points in the Far West. The sample carries iron-manganese silicates, iron oxides, microscopic pyrite, traces of lead, and some chrome, which is as far as we are able to say. The sample is of good quality. Free assays might yield gold and silver, however.

Not Quartz.

LOS ANGELES, Aug. 19.—Q: What kind of quartz? Assay for gold and silver.

A: The sample is a burnt up iron ore; silica present. It is from a 2-inch seam; porphyry matter detected and free gold.

For other gold (and silver included) kindly consult assayers.

Cinnabar Abundant.

ORANGE, Aug. 20.—Q: I am forwarding you parcels post sample rock from Santiago Canyon, Orange county, California. Kindly classify and advise if any indications of cinnabar. Thanking you in advance.

A: The sample is a very much altered rock; probably sedimentary. Iron oxides, traces of pyrite, and microscopic pyrite. We can get no reaction for cinnabar.

Conglomerate.

LOS ANGELES, Aug. 20.—Q: I am sending under separate cover sample of ore from California. Will you kindly analyze it for pyrite and potash. What is its value for fertilizer? Thanking you in advance.

A: The samples carry traces of pyrite with iron sulphate. The white coatings react slightly for potassium nitrate and sodium chloride. Of nominal value, probably, as a fertilizer, unless a better grade is obtainable at the locality.

Baryte.

PHOENIX (Ariz.) Aug. 20.—Q: Baryte, scheelite, strontianite, borax, or what?

A: The sample is named in the sub-heading.

Chiefly Reddle.

PHOENIX (Ariz.) Aug. 21.—Q: Does the sample contain cinnabar, arsenic, ruby silver? L: The sample is a very much altered rock; probably sedimentary. Iron oxides, traces of pyrite, and microscopic pyrite. We can get no reaction for cinnabar.

Conglomerate.

MEXICAN OIL
GROWTH HUGE.
NEW PRODUCERS

Enormous Increase in Output
During Twenty Years.

Many New Wells Are Yielding
in Spectacular Way.

Exploration Work Carried on
Throughout Country.

MONTEREY (Mex.) Aug. 31.—Additional statistics relating to the oil industry of Mexico have just been compiled by the Department of Industry and Commerce. The magnitude of oil production of the country is shown by the statement that a total of \$63,523,752 barrels of forty-two gallon each were produced to the surface from the year 1901 to 1921. The quantity increased yearly from 12,445 barrels in 1901 to 153,549,000 barrels in 1920.

The division of special taxes of the Department of Finance has given out figures showing that on January 1 of the present year there were 259 petroleum wells in Mexico, with a daily available production of 3,117,846 barrels.

From January to May 1 there was registered an increase of forty-two wells with a daily output of 328,723 barrels.

In the Amatlan district of the Tampico-Tuxtepec fields five wells have been opened since January 1, 1921, yielding an aggregate of 497,000 barrels a day.

WELL DETERMINED FIELDS.

The well determined oil fields of Mexico extend along the Gulf of Mexico from a district north of Tampico to the Isthmus of Tehuantepec and Tabasco, the statement of the Department of Industry and Commerce says.

The well-explored portion is comparatively small, but the oil-bearing formation is extensive. The oil-bearing formation is extensive. The oil-bearing formation is extensive.

First the
Bondhouse; then the Bond

OCCASIONALLY people come to us with the idea that buying bonds is an intricate and difficult matter. It isn't—not at all! The purchase of bonds is one of the safest and most convenient forms of investment.

If you have \$500 or more for investment it will pay you to get in touch with us. And if you have always considered bond buying a difficult matter, let us show you how easy, how safe, how convenient it is not only to purchase, but in the attention it requires thereafter.

Right now there are exceptionally attractive opportunities available for your funds—in denominations of \$500 and \$1000. If you have such a sum, call, write or phone and let us tell you about high-grade bonds paying from 7 to 8 per cent—backed by excellent security and established earning power.

We believe there is more to the investment business as a business than merely selling bonds. And as a matter of fact, a sale marks the beginning, not the end of our service.

It is important, however, that you invest your money through a reputable investment house. You can't go wrong on the bond if your selection of the bondhouse is right.

Important Features

How many investors realize the protection afforded through the medium of our Monthly Investment Plan, and the opportunity to accumulate large surplus equities over and above the margin requirements in an ordinary account.

We will gladly explain how this plan works in relation to the securities you are contemplating the purchase of at the present time, and will forward complete descriptive leaflet on request.

A close-up photograph of a document, likely a form or a ledger. It features a decorative border with a scalloped or wavy pattern. Inside the border, there is a grid of small, dark dots arranged in rows and columns, possibly for data entry or as a guide for writing. The document is placed on a light-colored, textured surface.
